WHAT HAVE YOU
DONE ALREADY TO
IMPROVE WORK
RELATED ROAD
SAFETY?

DO YOU AUDIT
YOUR COMPANY
CAR DRIVERS?

WHAT ARE YOU
DOING TO GAIN
COMPETITIVE
ADVANTAGE
THROUGH SAFETY?

ROAD SAFETY IN YOUR BUSINESS

BETTER DRIVERS FOR A BETTER BOTTOM LINE

- In-Vehicle Driving Assessments provide a practical evaluation of a driver's skills, attitudes and behaviours. The driver is required to negotiate the local driving environment in their normal work vehicle to identify any training needs or prevalent pattern of errors under the usual varied business pressures.
- Qualified Instructors provide remedial training and tips.
- On-road hazard awareness is improved and "autopilot" driving complacency is identified. Special focus on the drivers' ability to avoid potential collision situations is targeted. The drive and debrief takes one hour.
- Assessments are customised to your individual drivers schedule. You get a written report on each driver's performance.

CUSTOMISE YOUR COURSE

- What are the costs of driving risks to you and your business?
- What could you do to reduce the financial impact of insurance premiums, employee accident and leave costs, and other vehicle expenses?
- To meet the complex needs of New Zealand's businesses to get best value for the dollars invested in motoring and vehicle transport, the AA has developed some simple tools to help you to identify how to improve the safety of the driving environment in your company.
- AA will work with you to identify how your organisation can improve its driving safety.
- Through the whole process, you make the decisions, we give you the support you need to implement them.
