Range Rover LHD-2002 on (dual front, side and curtain airbags)					
Mercedes Benz M class* LHD-2003 on (dual front, side and curtain airbags)					

LHD - Left Hand Drive variant tested in Europe

Note: "Curtain" means the airbags cover both the front and rear side windows and normally deploy from the roof lining above the doors. "Side head airbag" means there is an upward projecting extension of the side airbag that normally deploys from the seat. "Tubular" refers to an airbag that deploys from the roof lining and stretches diagonally across the front side window.

*The Mercedes Benz M class has been recently superseded by a new model.
