Our Online Risk Assessment is a great starting point for Fleet Managers, Health and Safety professionals and company owners who want to identify their drivers' levels of risk before investing in advanced driver training. The risk is designed to highlight areas of risk that can impact a driver's safety, and that of other road users.

What's included:

This assessment takes approximately 15 minutes to complete, and can be completed online anytime and anywhere as long as there is internet access.

Each driver who is selected to complete the Online Driver Risk Assessment will receive a unique e-mail invitation.

The assessment identifies levels of driver risk by taking them through a series of questions and scenarios and assessing their responses. The six areas of driver risk we cover are:

- Road rules
- Attitude
- Driving behaviour
- Driving history
- Driving requirements
- Vehicle safety knowledge

Based on the driver's answers, an individual profile is compiled and a customised solution is offered to target the specific needs of the driver.

A detailed report is produced for each driver, with recommended actions, and a summary report is produced showing the results of all participants. This will be emailed directly to the driver or manager as required.

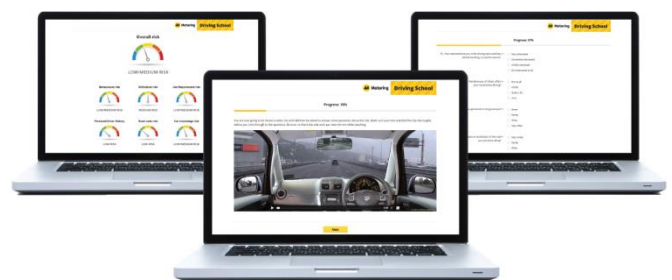

Our Online Driver Risk Assessment provides a unique platform for self-evaluation and valuable insight into your employees driving profiles. It is a great first step towards creating safer drivers and safer roads.

It's suitable for:

- ✓ Anyone that drives a company vehicle or their own vehicle as part of their job

Key Features:

- Easy to deploy via email
- Tests Road Code knowledge and basic vehicle safety knowledge
- Quick to complete, it only takes 15-20 minutes
- Video clips and observation questions included
- Extensive individual report emailed to the manager for review
- Recommendations for further training provided if required
- Group reporting available at no extra cost for orders of 100+ assessments
